Prairie Technology Introduces Bulk Spray Equipment to Dispense Sprayable Vacuum Bag Material at IBEX 2010

Louisville, Kentucky, September 28, 2010

Prairie Technology Group, Inc. introduces SWORL bulk spray equipment at the IBEX 2010 show. The PRSI SSM-3 is being introduced as their low cost table top bulk spray equipment. The PRSI SSM-3 equipment will spray two part, PRSI 308-556FC, to make a high strength, light weight, fast cure, translucent reusable vacuum bag for CCBM of multiple composite parts. The reusable vacuum bags may be used for autoclave or infusion applications. The PRSI SSM-3 equipment under 60 lbs dispenses directly from five gallon pails. Visit Booth #1734 to view live demonstrations of the SWORL process spraying PRSI 308-556FC using the PRSI SSM-3 equipment.

For more information about the SWORL process, PRSI 308-556FC, or PRSI SSM-3 equipment, contact: Larry Audette, Prairie Technology Group, Inc., 602 E. Front Street, Hutto, Texas 78634, 512-846-2444, ext. 313 or e-mail: info@prairietechgroup.com. Visit our web site at www.sworl.net.
